

## Environmental Policy

The Company is committed to develop and implement a Corporate Environmental Policy designed to ensure that all elements of the environment are protected through well planned and managed services, based on proven principles of quality assurance, monitoring, auditing, control and annual review.

The Company will ensure that:

- a) Waste Management and Transport Activates are undertaken in a professional manner geared towards the protection of human health and the environment.
- b) All vehicles and containers will be maintained to the highest standards in order to minimise pollution and avoid spillages
- c) Landfill sites used for waste disposal will operate to the highest standards and will be regularly audited to ensure complice.
- d) Our commitment to material re-uses and recycling will ensure that our operations have a minimal impact on natural resources.
- e) We will pro-actively advise our customer on waste minimisation best practices and introduce recycling and re-use wherever possible.
